

Capital Profit Solutions – Custom Equipment Leasing Options!

Standard Lease For the traditionalists, the length of the loan can range from 24 to 72 months. This transaction can be structured so that the client takes ownership of the equipment after the lease term. In addition, as in most leasing, there may be zero down and no closing costs.

Master Lease This is the most popular lease option. This type of transaction should be utilized when either several pieces of equipment are being purchased at different times, or to lock in a fixed low rate and when the appropriate equipment is located, the funds are immediately available. Being approved can aid in the price negotiations between your company and the prospective equipment vendor.

Seasonal Payment If your company is like many, you experience lower revenues during a certain time of year. This payment option will allow for payments to decrease as low as \$100. per month during these slow months. This program is designed to help your company's cash flow and still be able to acquire the necessary equipment needed to maintain your company's productivity

90-Day Deferral. Your company can benefit from a 90 day window before the first payment is due. This option is used when the purchased equipment has a learning or training curve before maximum revenues can be reached.

Step – Up Payment This form of financing allows for your company to enjoy a payment schedule

which starts low and increases as your equipment begins to increase revenues. Payments can be as low as \$100 per month for the first year and resume back to the original amount thereafter. The burden of cash flow can now be eased with this option.
